IN THIS FILE:
/com_k2/templates/templatename/item.php (line 364)

LOOK FOR THIS:

```
=====================================================================
<?php if($this->item->params->get('itemAttachments') && count($this->item->attachments)): ?>
        <!-- Item attachments -->
        <div class="itemAttachmentsBlock">
            <span><?php echo JText::_("Download attachments:"); ?></span>
            <ul class="itemAttachments">
             <?php foreach ($this->item->attachments as $attachment): ?>
             <li>
                <a title="<?php echo htmlentities($attachment->titleAttribute, ENT_QUOTES, 'UTF-8'); ?>" href="<?php echo JRoute::_('index.php?option=com_k2&view=item&task=download&id='.$attachment->id); ?>">
                    <?php echo $attachment->title ; ?>
                </a>
                <?php if($this->item->params->get('itemAttachmentsCounter')): ?>
                <span>(<?php echo $attachment->hits; ?> <?php echo (count($attachment->hits)==1) ? JText::_("download") : JText::_("downloads"); ?>)</span>
                <?php endif; ?>
             </li>
             <?php endforeach; ?>
            </ul>
        </div>
        <?php endif; ?>

            <div class="clr"></div>
  </div>
  <?php endif; ?>
=====================================================================
```

REPLACE IT WITH THIS:

```
=====================================================================
<!-- Item attachments -->
<?php if($this->item->params->get('itemAttachments') && count($this->item->attachments) && $this->user->guest):  ?>
<!--if guest -->
You must login to access these downloads!
<!--end if guest-->
<?php else: ?>
<!--if logged in-->
        <div class="itemAttachmentsBlock">
            <span><?php echo JText::_("Download attachments:"); ?></span>
            <ul class="itemAttachments">
             <?php foreach ($this->item->attachments as $attachment): ?>
             <li>
                <a title="<?php echo htmlentities($attachment->titleAttribute, ENT_QUOTES, 'UTF-8'); ?>" href="<?php echo JRoute::_('index.php?option=com_k2&view=item&task=download&id='.$attachment->id); ?>">
                    <?php echo $attachment->title ; ?>
                </a>
                <?php if($this->item->params->get('itemAttachmentsCounter')): ?>
                <span>(<?php echo $attachment->hits; ?> <?php echo (count($attachment->hits)==1) ? JText::_("download") : JText::_("downloads"); ?>)</span>
                <?php endif; ?>
             </li>
             <?php endforeach; ?>
            </ul>
        </div>
        <?php endif; ?>

            <div class="clr"></div>
  </div>
<!--end if logged in-->
<?php endif; ?>
=====================================================================
```
